Informed Consent to Chiropractic Treatment

The nature of chiropractic treatment: The doctor will perform an examination and x-rays, if necessary, to determine a diagnosis and make treatment recommendations. If treatment is initiated, the doctor will use his/her hands or a mechanical device in an attempt to restore normal function to your joints and muscles. Various ancillary procedures, such as hot or cold packs, electric muscle stimulation, therapeutic ultrasound or other soft tissue techniques may also be used.

Possible risks: As with any health care procedure, complications are possible following a chiropractic manipulation and/or ancillary procedures. Extremely rare complications could include muscle strain, ligamentous sprain, injury to intervertebral discs, rib fracture, or nerve injury. A small minority of patients may notice stiffness or soreness with the first few treatments. The ancillary procedures/hot packs could produce skin irritation, burns, or minor complications.

Other treatment options which could be considered may include the following:

- Over-the-counter analgesics. The risks of these medications include irritation or damage to the stomach, liver, kidneys, ulcers or other side effects in a significant number of cases.
- Medical care prescription anti-inflammatory drugs, muscle relaxers and analgesics. Risks of these drugs include the above mentioned side effects and patient dependence on narcotics.
- Surgery, in conjunction with medical care, adds the risks of adverse reaction to anesthesia, death, as well as an extended convalescent period in a significant number of cases.

Risks of remaining untreated: Delay of treatment allows formation of adhesions, scar tissue and other degenerative changes. These changes can further reduce skeletal mobility and cause chronic pain cycles. It is quite probable that a delay of treatment will complicate your condition and make future rehabilitation more difficult.

I have read the explanation above of chiropractic treatment. I have had the opportunity to have any questions answered to my satisfaction. I have fully evaluated the risks and benefits of undergoing treatment. I have freely decided to undergo the recommended treatment and hereby give my full consent to treatment.

Initial _____

I understand that all services are to be paid in full at the time of service. I hereby authorize the doctor to release all information necessary to secure the payment of benefits. I clearly understand that all services rendered to me are charged directly to me and I am personally responsible for payment. I also understand that if I suspend or terminate my care and treatment, any fees for professional service rendered to me will be immediately due and payable. I authorize the use of this signature on any insurance submissions.
